Introduction Letter

Dear Sir,

We would like to introduce ourselves as one of the leading full service manufacturer and contractor of architectural aluminium and glass products that provides building industry Design, engineering, shop drawings, fabrication and installation of Aluminium; including Stick Curtain Walling, conventional systems (fully capped, two sided cap & 4 way structure).

As well we are specialized manufacturer of non structural metal works such as Gates, Staircase, Balconies, Fencing, Canopy, Screens and other items in Cast Aluminium, Wrought Iron and Stainless Steel and Glass Works such as Staircase, Balconies & Doors. We pride ourselves that we developed throughout the throughout the years highest standards of excellence and best practices and our achievements have been certified and awarded by the following international entities and organizations.

ISO 9001:2008 (Quality Management Systems),

ISO 14001:2004 (Environmental Management Systems),

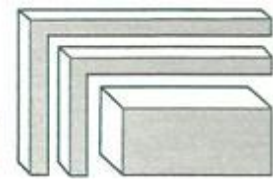

OHSAS 18001:2007 (Occupational Health & Safety Management Systems)

ACTIVITIES

Facades:

A. Stick Aluminium Curtain Wall System

- 4-Way Caped System”
- 2-Way Structurally Glazed System”
- 4-Way Structurally Glazed System

**B. "Point Fixed Glazing**

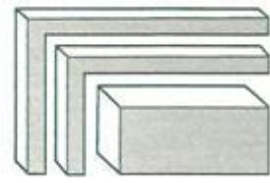

- Spider Systems on:
 1. Glass Fins (Structural support for the frameless glazing façade)
 2. Steel Fins (Structural support for the frameless glazing façade)
 3. Stainless Steel Fins (Structural support for the frameless glazing façade)
 4. Steel Frames (Structural support for the frameless glazing façade)
 5. Stainless Steel Frame (Structural support for the frameless glazing façade)
 6. Steel Truss (Structural support for the frameless glazing façade)
 7. Stainless Steel Truss (Structural support for the frameless glazing façade)
 8. Stainless Steel (Solid Rod Truss) (Structural support for the frameless glazing façade)
 9. Transparent Stainless Steel (Single Cable System) (Structural support for the frameless glazing façade)

Doors

- A. Aluminium Sliding
 - B. Hinged
 - C. Tilt & Slide
 - D. Tilt & Turn
- For all the above, Automatic operations can be added when needed.

Windows:

- A. Sliding
- B. Hinged
- C. Tilt & Slide

- D. Tilt & Turn
- E. Tilt & Hinge
- F. Top Hung
- G. Bottom Hung
- For all the above, Automatic operations can be added when needed.
-

Canopies:

- A. Canopies with Cladding
- B. Canopies with St. Steel
- C. Canopies with Wood
- D. Canopies with Louver

Railing & Fences:

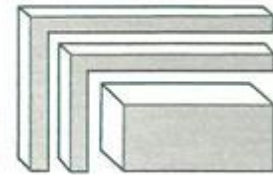

- A. St. Steel Handrails
- B. Aluminium Handrails
- C. Steel Handrails
- D. Glass Handrails

Cladding:

- A. Solid Aluminium Cladding
- B. Solid Stainless Steel Cladding
- C. Honey Comb Composite Aluminium Cladding
- D. Composite Cladding with Polyethylene Core

Partitions:

- A. Linear Glazing Partitions with clear or obscure glazing
- B. Steel Framing Partitions with glass infill panels
- C. Ceramic Frit Glass Partitions
- D. Frameless Partitions (Dorma Systems)

- E. Aluminium / Wood Partitions with Brass Framing
- F. Switchable Glass Partitions
- G. Fire Rated Glass Partitions

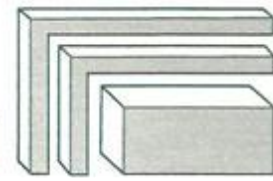

Glass Selection:

- A. Clear
- B. Tinted
- C. Medium Performance Hard Coating
- D. High Performance Hard Coating
- E. Medium Performance Soft Coating
- F. High Performance Soft Coating
- G. Double Glass Units
- H. Curved Glass Units
- I. Laminated Glass
- J. Curved Laminated Glass
- K. Blast Resistant Glass
- L. Bullet Resistant Glass
- M. Acoustic Insulated Glass
- N. Ceramic Frit Glass
- O. Switchable Glass
- P. Fire Rated Glass

All stages of work are done in our factory like **Casting, Fabrication, Powder Coating and Wooden Work** as well, then fixing at site.

Presently we are working with some of the leading consultants & contractors in various projects.

We would also like to bring your kind attention that we are the dealer of **Euromatic** (Italian Company) for all Automatic System & Electric Lock for Gates.

May we now request you to invite us for all your enquiries.

Meanwhile we look forward for an appointment with your good self to discuss present & future projects.

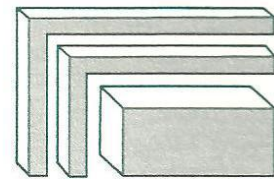

Please advise us your time and date as per your convenience.

Looking forward to receive your favorable response on the above at the earliest & oblige.

Sincerely yours,

For ***Cast Aluminium Industries***

Engr. Ali Altaif
General Manager

ISO CERTIFICATES

CERTIFICATE

Management system as per
BS OHSAS 18001 : 2007

In accordance with TÜV NORD CERT procedures, it is hereby certified that

Cast Aluminum Industries L.L.C.
Plot # 368-0452, St # 15, Al Quoz Ind. Area 3
P.O. Box 37077, Dubai
United Arab Emirates

applies a management system in line with the above standard for the following scope

Recycling of Aluminium Drosses, Scraps and Allied By-Products

Certificate Registration No. 44 116 137141
Audit Report No. 5800 6075

Certification Body
at TÜV NORD CERT GmbH

Message from the Management:

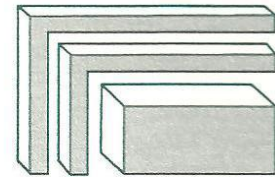

Amongst the most outstanding achievements in the UAE is the remarkable boost realized by the national industry, matching and duly competing with the most established companies in the world.

Such a success is certainly the crowning touch of undeniable efforts deployed by the national council in enhancing and keeping high the image of the UAE Cast Aluminium Industries is definitely an eloquent example of the success, it is now regarded as a confirmed landmark in the field for its **27 years of expertise on Non-structural Metal & Glass Works.**

The comfortable position of Cast Aluminium Industries in the market is the result of the combination of different factors, among these, the highly qualified and hardworking staff. The fluidity and effectiveness of the managerial staff, the inventive and meticulous technical and artistic work and finally perfect execution of the final product.

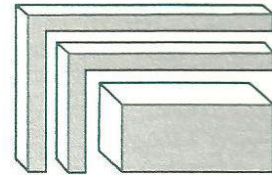

In order to offer nothing but the best to its clients, Cast Aluminium Industries they live at the rhythm of three commandments, which are, delivery on time, unbeatable prices and unmatched quality.

Mr.Sulaiman Mohamed Khalifa Alsuwaidi
Chairman

PRE - QUALIFICATION

- The Quality Management System**
- Marketing & Sales Department**
- Design Department**
- Fabrication Department**
- Product Department**
- Types of our Specialized**

Pre-Qualification

1. The Quality Management System

By following the schematic procedure, the Company works on different business matters with proficiency. Everything is documented and carefully studied by the Management. The procedure has been made resilient enough.

To keep abreast of the profound changes in the spectacular world of business.

2. Marketing and Sales Department

We identify clients' needs and provide solutions whenever and wherever needed. Our experienced sales and marketing team is at your service all the time.

3. Design Department

Each project is meticulously designed considering its features as well as fundamental requirements such as structural stability, air tightness and water tightness. Design and creation of new products possible to help realize the dreams of consultants / clients.

4. Fabrication Department

Equipped with the latest models machinery ensures, precise fabrication and air/water tight hairline joints. All facilities including TIG/MIG welding, material bending, punching, Glass Cutting, Stainless Steel Polishing are available in-home.

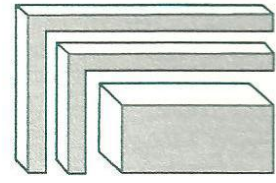

5. Product Department

A highly experienced team of engineers and technicians are always on site taking the challenge right from design, work execution, installation, until the satisfactory handing over to client according to the commitments.

6. Types of our Specialized:

The company main objects of activities are to undertake major projects from all over Emirates and Overseas. Cast Aluminium Industries fabricate supplies and installs the widest range of high quality products to international specifications and standards. We are proud of the quality of our products right from design, material procurements, material processing work execution and our commitment to meet the customer requirements. Our products are categorized as follows:

- a. Aluminium & Cast Aluminium Products (Fences, Gates, Balconies, Screens, ---- etc.)
- b. Mild Steel & Wrought Iron Products (Fences, Gates, Balconies, Screens, ---- etc.)
- c. Glass Works (Internal Doors, Balconies, Terrace Railings, Staircase Railings, --- etc.)

Installation is carried out by our skilled & friendly team.

a. Aluminium & Cast Aluminium Products

We are specialized in the following:

- ❖ All types of Cast Aluminium Gates (Swing or Sliding) Manual or Automatic.
- ❖ All types of Cast Aluminium Balconies (hollow or solid)
- ❖ All types of Cast Aluminium Staircases Railing (with wooden handrail or Aluminium handrail)
- ❖ All decorative Screens, Fences, Ladders

b. Wrought Iron Products

We fabricate the latest designs of Wrought Iron products such as:

- ❖ Wrought Iron Gates (Swing or Sliding) Manual or Automatic.
- ❖ Wrought Iron Balconies (hollow or solid)
- ❖ Wrought Iron Staircases & Hand Railings (with wooden handrail or Aluminium handrail)
- ❖ Wrought Iron decorative Screens, Fences, Window Grills and Steel Ladders.

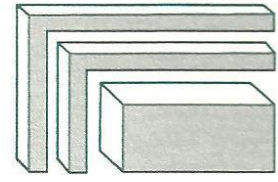

c. Glass Works

We supply & fix the following::

- ❖ Glass Balcony & Terrace Railing
- ❖ Glass Staircase Railings
- ❖ Glass Panels on Internal Doors & Windows

SAFETY & HEALTH PLAN

Tel: +971 4 3473322, Fax: +971 4 3472113
P.O.Box : 37077, Dubai, United Arab Emirates
Tel: +971 6 535 5661, Fax: +971 6 535 5662
E-mail : castalum@emirates.net.ae, Url: [http:// www.castalum.co.ae](http://www.castalum.co.ae)

SAFETY AND HEALTH PLAN

1. Introduction

Maintaining excellence in the safety of the work being done is a primary requirement not only for well-being of the personnel engaged in the construction work but also for the benefits that accrue through higher morale at work place and better output from project staff .It is for this reason, a safety program is formulated.

2. Scope

To prepare a safety and health program to company with the specific requirements of the contractor's project safety and health plan.

3. Purpose

- Elimination of human suffering resulting from accidents.
- Promotion of maximum efficiency through safe work methods and conditions.
- Reduce indirect adverse effects arising from accidents.
- To implement safety programs at construction site as per contract.

4. Safety Training

- Site safety conditions depend on operator training in the correct and safe execution of site activities.
- The key personnel at the office and site are periodically trained.
- International health and safety standards.
- Company's safety procedures.
- Accident prevention.
- Use of safety personnel protective equipment.

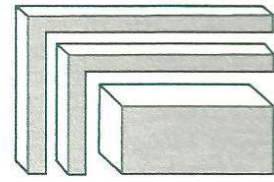

5. Training at the site

All site personnel are made aware of safety needs in the course of dedicated meetings held by qualified people. Site surveys are also conducted to detect potential risks and provide accident prevention measures. Safety meeting are organized for the prevention of the most frequent accidents.

6. Safety personnel

A safety inspector shall be deployed at the site who shall carry out the following safety related functions.

- Ensure that the workers engaged in any job or operations are fully aware of the hazards associated with the job are strictly following safe methods of working.
- To arrange and maintain all safety equipment, fire extinguishers, and first aid boxes in good condition and in easily accessible positions.
- To ensure that the workers come in proper clothing (overall) and use the right type of safety equipment like goggles, safety boots, helmet, etc.
- To made frequent rounds to plant or work area and check that all jobs are being done with proper safety precautions.
- To comply with all applicable safety and health related laws, regulations and the directives of the government and other agencies of competent jurisdiction.

- f) To promote awareness among the works about safe working methods and use of safety equipment.
- g) Immediately report to the site manager in the case of injuries, and/or damage to property of the constructor.
- h) Submit an accident report in the prescribed format.

7. Safety Representative

A safety representative will mainly function in an advisor capacity. In order to check up observance in safety rules and practices, he will conduct frequent inspections of the project site. He will guide the site personnel on the requirement of various statutory regulations and will ensure that proper compliance is done. In case of and observation of violation, he will bring organize various safety-training programs to train the employee in safe methods of working. His main function will be to develop safety consciousness amongst all the levels of employees in order to prevent/reduce accidents and losses.

8. Accident at the site

In order to handle accident cases, the safety inspector must have the following information.

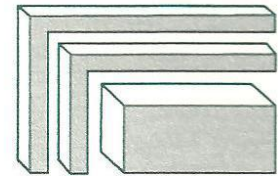

- a) A list of hospitals, their address, telephone number etc.
- b) A panel of doctors as available near the work site, with their address and phone numbers.
- c) Ambulance services available. The safety inspector shall immediately contact the medical center and the safety department of the client and inform the concerned person about the accident. He will submit an accident report in prescribed format of the client and the staff members shall be trained an administering first aid through suitable program.

9. Safety check list

For safety checklist, the following safety rules and regulations which give minimum rules of safety precautions to be taken during all types of constructions activities.

I. Electrical Work

- a) All temporary electrical works should confirm to statutory regulations and a certificate obtained by the authorities. Competent and licensed supervisors and wiremen shall maintain the connections and wiring. As far as possible, cables are to be safely buried to ensure free access to equipment and to facilitate easy movement of machinery.
- b) Safety helmets made out of insulating material are to be used by personnel working in 'Live' areas like substation, etc.
- c) Safety boots, necessary hand gloves as required shall be used.
- d) Earthing of equipment and machinery shall be ensured. No open bare connections allowed. The arrangements should be checked periodically for damages to the insulation and loose connections, etc .. ZShould be rectified so that the following non-hazardous.

- e) The areas of working during night shall be properly illuminated with floodlights and hand lamps as per the demands of the job.
- f) Danger signals and safety tags 'Live' areas shall be demonstrated properly. All connections should be switched off after working hours.
- g) Isolation switches and main switches shall be easily accessible.

II. Safety Applications and their Distribution

Safety Helmets.

Required to be made available to all constructions staff except those in accounts, administration and personnel departments.

Goggles

To be issued to those directly involved with supervision of various welding and gas cutting works.

Hand Gloves

Issuing of these is to be limited to site personnel directly involved in the work which requires the use of gloves. The site-in-charge will decide the usage on the merits of the case.

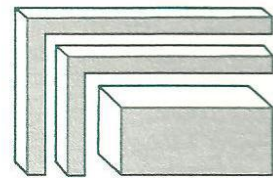

III. Responsibilities

A. Project Manager

1. Implementation of safety policy and safety plans within this project location.
2. Advice safety manger / safety officers on aspects of safety relating to a particular activity, plant or machinery.
3. Investigate all incidents and near misses with the help of safety manger/safety officer to establish cases and evolve measures to prevent reoccurrence.
4. Conduct fortnightly meetings with supervisors/foreman, safety officers assigned to this project.
5. Monitor safety during visit to site.

B. Safety Officer

1. Training of supervisors and workers, initial and on the job.
2. Daily instructions and toolbox meeting at sites.
3. Fortnightly meetings at project level.
4. Monitoring and investigations of incidence including near misses.
5. Implementation of corrective measures.
6. Report to clients and safety coordinator.
7. Inspection of vehicles/equipment en route.
8. Safety audit on specific instructions.

D. Engineer/ Supervisor/ Foreman

1. Plan and implement safety at the work site.
2. Explain to the persons concerned the visible and hidden hazard involved in the job.
3. Obtain necessary safety clearance for the nature/type of work to be carried over in advance, in consultation with safety officer and in accordance with safety instructions and procedures laid down for the work.
4. Instruct his personnel before commencing the work as to the safety precautions and measures to be observed at work.
5. Try to evolve a method to overcome any new contingencies for which instructions have not been issued. In case he is unable to find a suitable solution, stop the work and contact the project Manager and the Safety officer for necessary advice.
6. Contemplate and evolve new measures or methods for safety implementation and put up in writing every month to Project Manager/Safety Officer.

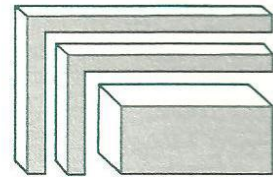

IV. Equipment Safety / Accident Prevention

A. Personnel Protective Equipment.

1. Proper types of goggles and other protection should be used for specific jobs like welder's goggles, blaster's helmets, painter's apron etc.
2. Suitable and proper types of gloves are to be used for specific jobs.
3. Gloves should be in good conditions, without cuts or abrasions.
4. Safety belts and life lines should be used while workings at high elevations.
5. Electricians working at heights or overhead lines should use lineman's belts and gloves.
6. Safety helmets should be used in construction area, under towers and in places where falling materials can be expected.
7. All personnel at work sites should wear safety boots.

B. Lifting Equipment

1. They should be trained in general principles of slinging.
2. Conversant with safe working loads at different radii of the lifting equipment with which they are working.
3. Capable of ensuring safe movement of the lifting equipment and its load to maintain safety to personnel and property.
4. The lifting equipment will be inspected every month and ensured that it is mechanically sound by the Equipment Engineer.
5. Particular care should be taken if overhead electric cables exist in the near vicinity of lifting equipment.

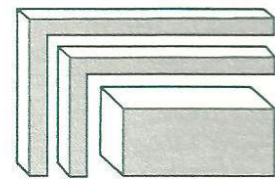

6. Lifting equipment should be operated only on clear hand signals made by signal man.
7. Other workers and operators working within the radius of the lifting equipment should be ever watchful of his movements and observe safety rules.
8. The operator must be trained on the equipment and licensed.
9. Personnel working with the lifting equipment or in the vicinity should not stand near or under the load while it is being lifted or positioned.

C. Hand Tools.

1. Employees should be trained in using the right tools for each job, after analyzing each job for its safety aspects.
2. Supervisor/ Forman should monitor each employee for correct usage of tools.
3. Goggles and screens are to be used wherever needed.
4. Insulated tools are to be used for Electrical Maintenance work.
5. Spanners and wrenches should fit well. Their jaws should be sharp and not spread out so that you get a good grip.

Hints:

- a) The right spanner depending up on the dimension and shape of screw head or nut.
- b) Serviceable handle without cracks or other damage to every file, screwdriver or hammer.
- c) Chisels and punches with mushroomed heads should be ground on the wheel.
- d) Striking tool heads should be securely wedged on their shaft.
- e) Edges of cutting tools should be maintained sharp and straight.
- f) Hands should be behind cutting edges while working.
- g) Screwdriver should not be used with the objected held in the hand.
- i) Scrap tools that are worn out or are beyond repair to be scrapped.
- j) Tools should not be laid down giving a chance to roll, or be knocked over.
- k) Where possible, tools should be hung from racks.
- l) Ensure all cutting edges, teeth, etc are adequately scaled or well protected when not in use.
- m) Tools should be kept properly in a box or other suitable container when not in use.
- n) For long-term storage, they should be returned to the store to be kept locked up.

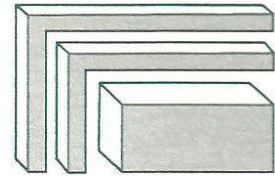

D. Electricity operated tools

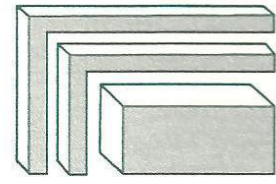

- 1) Operators should be trained properly for the work to be done by telling them the hazards and safety precautions to be observed.
- 2) Tools should be checked before use for:
 - Signs of damage.
 - Signs of wear or damage to cables and wires. In case of damage, the tools should not be used but reported for repair.
- 3) All tools should be properly earthed and provided with the correct type of fuses.
- 4) In temporary wiring installations, only approved waterproof socket outlets, plugs and distribution boxes should be used.
- 5) All connections to socket outlets or wire-to-wire should be made by proper electrical plugs NOT by bare and cables.
- 6) Cables and wires should not be allowed to be exposed to moisture.
- 7) Tools should not be carried or dragged by its cable.
- 8) Wires and cables should be laid out of the way of other operatives to avoid tripping hazard.
- 9) Tools should be used at the correct speed setting for the work To be done.
- 10) Correct drill bits or blades should be used and chucks should be secured.
- 11) Tools should be disconnected from mains when not in use and before changing of blades, dices and drill bits.
- 12) Regular maintenance of electrically operated tools should be carried out by properly trained and authorized personnel only, as temporary repairs by amateurs can be very dangerous.
- 13) All personnel at the site should known to deal with electrical shock and the use of correct fore extinguisher for electrical fire.

E. Welding precaution and special care.

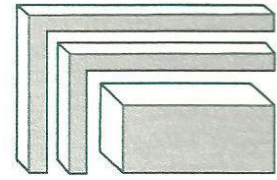

- 1) Check whether the welder has gone through the induction training.
- 2) The clothing of the welder must be of the least flammable material possible.
- 3) The welder while working should use gloves, aprons, hip leggings and goggles or face shield.
- 4) When scaffolding is required for welding works, suitable scaffolding has to be executed.
- 5) Do not use weld or burn any containers where any inflammable materials are stored or there is explosive gas.
- 6) Do not use electrical conducts for earthling.

- 7) All connections must be clamped or bolted securely.
- 8) Insulation of the holder must be checked and leak rectified.
- 9) Welding cables and gas tubes (hose) must not be dragged or pulled along the floor. They must be lifter up or carried to avoid damage to them.
- 10) Whenever welding work or cutting operations is done on elevated places, make sure that the sparks do not fly or fall on equipment or materials and cause fire. Provide a suitable shield or screen to arrest the flying sparks.
- 11) It is recommended that the floor is wetted to quench the flying sparks wherever possible.
- 12) Gas hose must be frequently inspected for deteriorations or leaks because such leaks lead to fire or explosion risks.
- 13) Goggle or welding shield must be used while chipping or grinding, brushes must be sued for cleaning welding metals.
- 14) New employees must be given proper training and guidance.
- 15) Ensure that appropriate welding current setting is made at the welding machine for the specific job.
- 16) Special care should be taken in the following ways:
 - a. Work area should be well ventilated.
 - b. Welding hood in position at all times of welding.
 - c. Hardened filter lens used under hood or shield.
 - d. Person in close proximity provided with shield or goggles to protect from eye damage.
 - e. The place of welding must be sufficiently screened to prevent the rays from affecting the others.
 - f. Combustible materials must be kept away from the area.
 - g. Non-combustible materials must be used as support for the jobs.
 - h. Cables and hoses are not tangled, are properly supported, and are laid away from sparks. Cables should be well insulated. Earth connections should be good.
 - i. Welding rods kept aside in containers, not thrown on the floor.
 - j. Water and extinguishers kept handy while welding.

BUSINESS ASSOCIATES & AFFILIATIONS

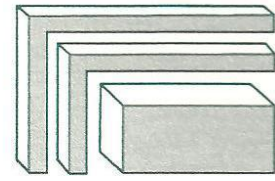

For over 25 years of continuous success and expertise in the field of Cast Aluminium, Steel & Glass Works, Cast Aluminium Industries LLC has developed a good relationship with some of the Globally Competitive Players in the Aluminium, Steel & Glazing Industry to offer the best quality of workmanship to our respected clients.

Below is the list of Companies that offer best quality products:

Aluminium Profiles for Gates, Railings, Fence, Screens etc.	Arabian Extrusion	- UAE
	Emirates Extrusion	- UAE
	Gulf Extrusion	- UAE
	Al Jaber Extrusion	- UAE
	Al Hamad Extrusion	- UAE
Glass	Select Glass Industries	- UAE
	Emirates Glass	- UAE
	Glaverbel	- Belgium
	Pilkinton	- USA
	Saint Gobain	- France
	Ford	- USA
	Iseo	- Italy
Accessories for Windows & Doors	Dorma	- Germany
	Geze	- Germany
	Savio	- Italy
	Giesse	- Italy
	Dow Coring	- USA
Silicone	Hidayath Group	- UAE
	Dubai Timber Building Mat. Tr. L.L.C	- UAE

Contract: R878/2 Palm Deira Access Bridge

Subject: Approval for M/s Cast Aluminum Industries, Dubai, UAE

Dear Sir,

Reference is made to your letter Ref: 202/R878/2/17R0186 dated 08 April 2017 concerning the above mentioned subject. We have no objection to your recommendation to approve M/s Cast Aluminum Industries, Dubai, UAE as Sub-Contractor for the supply and installation of aluminium related works including powder coating in the above project subject to the following:

1. Strict adherence to standards quality measures of works.
2. Fulfil the requirements of contract specifications.
3. Satisfactory performance as the company first time will work in RTA projects.

The above is for your information and necessary action

Best regards,

Dr. Mohammad Abdallah Yousef

Project No. 2011/5**

Subject: Aluminum Pergola Structure

Dear Sir,

With reference to the above project, your letter No. CPC/MAR/068/2011/MJ dated 22/03/2011, further to our letter No. 2011-5/3044/11 dated 01/03/2011, regarding Technical Appraisal for Subcontractor (Aluminum Pergola Structure), and our factory visit on date 2/03/2011, please note that we have no objection to approve M/s. cast Aluminum industries LLC, for the aluminum pergola structure complete with mashrabia and PVC fabric, subject to using pressure system for casting the aluminum, material and shop drawing approval and acceptable performance.

This is for your information and necessary action.

Best regards
